

Hygeia Power Wash Solutions 2026 Website Rebuild

Full PRD, information architecture, page-by-page specifications, design system, SEO requirements, and phased scope of work to turn hygeiapws.com into a keyword-rich, conversion-built site for commercial and residential pressure washing across San Jose–San Mateo.

hygeiapws.com → rebuild

14 pages specified

6 city landing pages

Full schema & SEO plan

180-day rollout

Prepared for
Hygeia Services — Andy Montero

Service Region
San Jose to San Mateo & the Peninsula

Prepared
September 2026

Project Overview & Objectives

This document is the build spec for the hygeiapws.com rebuild recommended in the September 2026 Hygeia Power Wash Solutions Digital Growth Audit. That audit found a single-page site with no title tags, no schema, no separate URLs, and a homepage funnel built around residential bin-cleaning subscriptions while commercial pressure washing — this project's real growth target — sat as an afterthought. This PRD turns those findings into a buildable, page-by-page specification, paired with a design system and a phased scope of work.

Primary objective

Replace the single-page hygeiapws.com with a true multi-page, SEO-structured website that (1) gives commercial and government facilities buyers a first-class, credible path to a quote, (2) keeps and improves the residential bin-cleaning and pressure-washing funnel that already converts through Jobber, and (3) is built from day one to rank for city + service search terms across the San Jose–San Mateo corridor and to be citable by AI answer engines (AEO/GEO).

Success looks like

- ✓ Every service and every city has its own indexable, schema-marked URL — no more single-page competition between offers
- ✓ A commercial buyer's first impression is a credible B2B vendor page, not a consumer subscription app
- ✓ The site visually and structurally reflects the parent Hygeia brand (35 years, DVBE/DGS/DIR-eligible sister company) without abandoning the Spartan mark customers already recognize
- ✓ Organic visibility exists for both "trash bin cleaning [city]" and "commercial pressure washing [city]" as two distinct, individually-ranking offers
- ✓ The residential Jobber booking flow keeps working exactly as well as it does today

In scope vs. out of scope

IN SCOPE	OUT OF SCOPE (THIS PHASE)
Full IA rebuild: 14 unique pages replacing the single-page site	Rebuilding hygeiaservices.com / siliconvalleyjanitorial.com (covered by the companion janitorial audit)
New design system, page layouts, and on-page copy for every page specified here	Custom photography shoot (flagged as a content dependency in Section 09)
Technical SEO foundation: schema, meta, sitemap, robots.txt, internal linking	Paid media / Google Ads campaign build
Keeping the existing Jobber booking integration for bin cleaning	Custom CRM or quoting software replacement
Tier-1 city page rollout (6 cities, fully specified)	Full 40+ city × service PSEO matrix (documented as Phase 4 template rollout)

Target Users & Personas

Every page in this PRD is written to one of three buyers below. Where a page serves more than one, the spec calls out which is primary.

Dana, Facilities Manager

COMMERCIAL — PRIMARY TARGET

Manages 2–6 commercial properties or a corporate campus. Compares 3–5 vendors before requesting quotes. Needs to see insurance/COI language, service scope (parking structures, dumpster enclosures, building exteriors), scheduling flexibility around tenant hours, and evidence of comparable commercial work — fast, without scrolling past consumer pricing cards.

Priya, Procurement Officer

GOVERNMENT / PUBLIC AGENCY

Sources vendors for a city, county, school district, or transit agency. Filters by certification status and searches specifically for DVBE/DGS/DIR-eligible vendors. Needs certification numbers, NAICS/service codes, a capability statement, and a clear point of contact for bid questions.

Marcus, Homeowner

RESIDENTIAL — EXISTING FUNNEL

Wants his driveway pressure washed or his trash cans cleaned monthly, at a clear price, booked in under two minutes. Already well served by the current Jobber checkout flow — this rebuild should not add friction here.

Design implication

Dana and Priya should never have to scroll past a \$35/month bin-cleaning offer to find what they need. The new information architecture (Section 03) gives commercial and government buyers their own entry points from the very first screen.

Information Architecture & Sitemap

Home /

Commercial Pressure Washing /commercial-pressure-washing
→ Government & Public Agency callout section (DVBE/DGS/DIR), linking to About
Residential Pressure Washing /residential-pressure-washing
Trash Bin Cleaning /bin-cleaning
→ Keeps existing Jobber checkout embed
Service Areas /service-areas (hub page, links to all city pages)
→ San Jose /service-areas/san-jose
→ San Mateo /service-areas/san-mateo
→ Santa Clara /service-areas/santa-clara
→ Sunnyvale /service-areas/sunnyvale
→ Redwood City /service-areas/redwood-city
→ Mountain View /service-areas/mountain-view
→ (Phase 4: Los Gatos, Saratoga, Cupertino, Milpitas, Palo Alto, Menlo Park, San Carlos, San Bruno + remainder of Hygeia Janitorial's 16-city footprint)
About /about — connects to Hygeia Janitorial's 35-year history
FAQ /faq — split bin-cleaning vs. pressure-washing question sets, FAQPage schema
Contact / Get a Quote /contact — dual paths: consumer Jobber checkout vs. commercial quote form

Navigation structure

PRIMARY NAV	UTILITY NAV / FOOTER
Commercial Pressure Washing · Residential Pressure Washing · Bin Cleaning · Service Areas · About · Get a Quote (button)	FAQ · Contact · Phone (click-to-call) · "A Hygeia Company" badge linking to hygeiaservices.com · Service-area city links · Social icons

This replaces today's single-page anchor nav ("Service Pricing," "How it Works," "FAQ," "Contact Us" all pointing at #section- IDs) with real, separately indexable URLs — the single highest-leverage technical change identified in the audit.

Page-by-Page Specification — Core Pages

Home — /

PRIMARY: HYGEIA POWER WASH SOLUTIONS

PURPOSE	Segment three audiences (commercial, residential pressure washing, bin cleaning) in the first screen; establish the Hygeia brand and 35-year parent credibility immediately.
KEY SECTIONS	Hero with three clear paths ("Commercial Properties," "Residential Pressure Washing," "Bin Cleaning Subscriptions"); trust strip (Hygeia 35-year badge, service-area map, insured/bonded); "Why Hygeia" proof section; featured before/after gallery (commercial + residential); service-area preview linking to hub; testimonials; closing CTA band.
PRIMARY CTA	Three CTAs, one per audience path — no single generic "Sign Up" button competing with commercial intent.
SCHEMA	Organization, LocalBusiness (sameAs → Hygeia Janitorial, BBB, Yelp, GBP)
SUCCESS METRIC	Click-through rate to each of the three service paths

Commercial Pressure Washing — /commercial-pressure-washing

PRIMARY: COMMERCIAL PRESSURE WASHING SAN JOSE

PURPOSE	The pillar page for Dana and Priya. Reads as a serious B2B/government vendor page, not a consumer app.
KEY SECTIONS	Answer-first intro (what/who/where in 2–3 sentences); service list with real specifics (parking structures & garages, dumpster enclosures, building exteriors, sidewalks & walkways, drive-thru lanes, graffiti removal); a dedicated Government & Public Agency module (DVBE/DGS/DIR certification numbers, capability statement download, NAICS codes); commercial-specific proof (before/after gallery, property types served); insurance/COI & safety-compliance statement; commercial FAQ block; quote-request form (property type, sq ft/area, service needed, timeline — not the consumer Jobber checkout).
PRIMARY CTA	"Request a Commercial Quote" / "Government & Public Agency Inquiries"
SCHEMA	Service, FAQPage, GovernmentService (or Service + custom properties for the DVBE module)
SUCCESS METRIC	Commercial quote-form submissions

Residential Pressure Washing — /residential-pressure-washing

PRIMARY: DRIVEWAY PRESSURE WASHING SAN JOSE

PURPOSE	Convert homeowners on driveways, patios, siding, decks, fences, and garage floors.
KEY SECTIONS	Service grid (driveways, patios/decks, siding & fences, garage floors); before/after gallery; simple starting-price guidance or a size-based estimate range; FAQ (frequency, drying time, eco-friendly chemicals); quote/booking CTA.
PRIMARY CTA	"Get a Free Quote"
SCHEMA	Service, FAQPage
SUCCESS METRIC	Quote requests / Jobber bookings from this page

Page-by-Page Specification — Core Pages, cont'd

Bin Cleaning — /bin-cleaning

PRIMARY: TRASH CAN CLEANING SERVICE SAN JOSE

PURPOSE	Preserve and improve the one part of today's site that already converts well.
KEY SECTIONS	3-step "How It Works" (keep — it works); Monthly Clean (\$35/mo) & One-Time Clean (\$65) pricing cards embedded via the existing Jobber checkout; before/after gallery; bin-cleaning-specific FAQ (the 7 existing Q&As, cleaned up and schema-marked); service-area list linking to city pages.
PRIMARY CTA	"Choose Service" → Jobber checkout (unchanged)
SCHEMA	Service, Product/Offer (pricing tiers), FAQPage
SUCCESS METRIC	Jobber sign-ups (maintain or grow current conversion rate)

Service Areas hub — /service-areas

PRIMARY: PRESSURE WASHING SERVICE AREA SAN JOSE TO SAN MATEO

PURPOSE	A single hub linking every city page — both for users and for internal-linking SEO value.
KEY SECTIONS	Regional map graphic (San Jose to San Mateo corridor); grid of city cards (each linking to its city page); "don't see your city? contact us" note.
SCHEMA	LocalBusiness areaServed list

City page template — /service-areas/[city]

PRIMARY: [SERVICE] [CITY], CA

PURPOSE	Rank independently for each city's commercial + residential + bin-cleaning search intent.
REQUIRED UNIQUE CONTENT PER CITY	A genuine local paragraph — not templated filler — naming real business districts, property types, or neighborhoods common to that city (see Section 06 for the 6 cities specified in this phase); a local FAQ variant; internal links to 2–3 neighboring city pages plus the Commercial page.
STANDARD MODULES (SHARED ACROSS ALL CITY PAGES)	Hero with city name + service summary; three service cards (Commercial / Residential / Bin Cleaning) linking to the pillar pages; trust strip; quote CTA.
SCHEMA	LocalBusiness + Service, with the specific city in areaServed

About — /about

PRIMARY: HYGEIA POWER WASH SOLUTIONS COMPANY

PURPOSE	Close the trust gap flagged in the audit — today's About page is blank.
KEY SECTIONS	Company story explicitly connected to Hygeia Janitorial Services' 35-year history; the Spartan brand mark's meaning ("we guard your property the way we've guarded Silicon Valley facilities for 35 years"); team/leadership; certifications block (shared with commercial page); service commitment.
SCHEMA	Organization, AboutPage

FAQ — /faq

ANSWER-ENGINE TARGET PAGE

PURPOSE	Primary AEO/GEO asset — direct answer-first content structured for AI Overviews and chat-assistant citation.
KEY SECTIONS	Two clearly labeled groups: Bin Cleaning FAQs and Pressure Washing FAQs (commercial + residential); each answer opens with a 2–3 sentence direct answer.
SCHEMA	FAQPage (full markup on every Q&A)

Contact / Get a Quote — /contact

CONVERSION PAGE

PURPOSE	One page, two clear conversion paths so neither audience has to interpret the other's form.
KEY SECTIONS	Path A: consumer — embedded Jobber checkout for bin cleaning / residential pressure washing. Path B: commercial/government — quote form (company, property type, service, sq ft, timeline, message) with response-time promise; embedded map; NAP; hours.
SCHEMA	ContactPage, LocalBusiness

City Page Content Briefs (Phase 1 — 6 Cities)

Each city page must include at least one paragraph of genuinely local content — not a find-and-replace of the city name — to avoid the thin-content pattern that hurts programmatic SEO. The local angle for each of the six Phase-1 cities:

CITY	PRIMARY KEYWORD	LOCAL ANGLE TO WRITE INTO THE PAGE
San Jose	commercial pressure washing San Jose	Downtown high-rises and retail corridors, North San Jose tech campuses and parking structures, and residential neighborhoods from Willow Glen to Almaden Valley
San Mateo	pressure washing San Mateo	Downtown San Mateo's restaurant row (grease/gum sidewalk cleanup), Hillsdale shopping-center-adjacent retail, and Peninsula office parks along Highway 92
Santa Clara	commercial pressure washing Santa Clara	Headquarters/office-park district near Great America and the Tasman corridor, plus multi-tenant retail centers along El Camino Real
Sunnyvale	pressure washing Sunnyvale CA	Dense mixed office/residential near Moffett Park and downtown Murphy Avenue's restaurant sidewalks
Redwood City	commercial pressure washing Redwood City	Downtown Redwood City's revitalized restaurant/entertainment district and the biotech/office campuses along Seaport Blvd
Mountain View	pressure washing Mountain View CA	Castro Street's dining district and the corporate campuses along Shoreline Blvd

Phase 4 note

The remaining cities from Hygeia Janitorial's 16-city footprint (Los Gatos, Saratoga, Cupertino, Milpitas, Palo Alto, Menlo Park, San Carlos, San Bruno, and others as the region expands) follow this same template in a later rollout — see the Scope of Work timeline, Section 10.

Design System Specification

Direction: **keep the existing Spartan-and-wave brand mark** — it's recognized and it's staying — and build a genuinely premium visual system around it, so the site reads as a serious commercial contractor rather than a consumer subscription app. The mark becomes a badge of craft and heritage (paired with the "35 years, Hygeia family" story) rather than the dominant graphic on every screen.

Color

ROLE	COLOR	USAGE
Deep Ocean (primary)	#0A2F42	Headers, nav, footer, dark section backgrounds
Spray Teal	#1C7A8C	Secondary accents, hover states, icon fills
Foam White	#F7FAFA	Section backgrounds, cards
Brass Gold (accent)	#C9972E	CTAs, the certification badge strip, the Spartan shield accent — pulled directly from the existing logo's gold
Charcoal Ink	#1B2530	Body text

Typography

ROLE	TYPEFACE	WHY
Display / Headlines	Fraunces (serif, high-contrast)	Gives the brand editorial weight and craftsmanship — distances the site from generic "local service" template design
Body / UI	Inter or Public Sans	Clean, highly legible at small sizes for spec-heavy commercial content
Numerals / Labels	Space Grotesk (small caps, wide tracking)	Used for section eyebrows, badges, and stat callouts for a technical, precise feel

Core components to build

Dual-path hero

Trust badge strip

Before/after slider gallery

Service spec card

City page hero template

Certification module

Commercial quote form

FAQ accordion (schema-linked)

Sticky mobile CTA bar

Full high-fidelity mockups of the home page, both pillar service pages, a city page, and supporting pages are provided as a companion design file alongside this PRD.

SEO & Structured Data Requirements

REQUIREMENT	DETAIL
Title tag template	[Primary Service] in [City], CA Hygeia Power Wash Solutions — unique per page, no duplicates
Meta description	Unique per page, 150–160 characters, includes city + service + one differentiator (e.g., "eco-friendly," "same-week scheduling")
H1	Exactly one per page, matching primary keyword intent
URL structure	Flat, human-readable slugs as specified in Section 03 — no query strings or anchor-only paths
XML sitemap	Auto-generated, submitted to Google Search Console at launch
robots.txt	Standard allow-all with sitemap reference
Canonical tags	Self-referencing on every page to prevent duplicate-content ambiguity
Internal linking	Every city page links to its 2–3 neighbors + the Commercial pillar; every pillar page links to relevant city pages; footer links to full service-area hub sitewide
Core Web Vitals budget	LCP under 2.5s, CLS under 0.1, INP under 200ms on mobile — verified pre-launch with PageSpeed Insights
sameAs entity linking	Schema sameAs properties connecting to hygeiaservices.com, BBB, Yelp, and Google Business Profile — see the companion audit's GEO section

Schema markup by page type

PAGE TYPE	SCHEMA TYPES
Home	Organization, LocalBusiness
Commercial Pressure Washing	Service, FAQPage, GovernmentService/custom DVBE properties
Residential / Bin Cleaning	Service, Product/Offer, FAQPage
City pages	LocalBusiness (areaServed = city), Service
FAQ	FAQPage (every question)
Contact	ContactPage, LocalBusiness

Technical Requirements & Content Dependencies

Recommended stack

Webflow or WordPress (multi-page CMS)

Jobber embed (booking — keep as-is)

Google Search Console + Analytics 4

Schema via CMS field templates

Google Business Profile API / manual sync for city NAP consistency

Either a template-driven CMS (Webflow) or WordPress with a proper page-builder is appropriate — the requirement that matters is that every page in Section 03's sitemap is a real, separately-editable, separately-indexable page with its own SEO fields, not a single template reused via anchors. City pages should use one shared page template with per-city content fields (headline, local paragraph, FAQ variant) so future cities in Phase 4 can be added quickly without a full rebuild each time.

Content & asset dependencies (needed from Hygeia before launch)

ASSET	STATUS
Real before/after photos — commercial jobs (parking lots, building exteriors, dumpster enclosures)	Needed — not currently on the site
Real before/after photos — residential pressure washing	Partial — bin-cleaning photos exist; pressure-washing specific photos needed
DVBE certificate number, DGS certification ID, DIR registration number	Confirm scope of coverage for pressure-washing service line with certifying agency
Certificate of Insurance (COI) summary language	Needed for commercial page trust module
Capability statement PDF (can share the one built for Hygeia Janitorial)	Adapt from companion janitorial audit's Section 08 recommendation
Any existing commercial client references (property management companies, HOAs)	Needed for case-study content

KICKOFF

- CORE BUILD**

- LAUNCH

- ## COMPOUNDING GROWTH

- Wks 1-2

Wks 3–6

Wks 6–8

Ongoing

Success Metrics & Sign-Off

METRIC	BASELINE	TARGET BY WEEK 12 POST-LAUNCH
Indexable pages	1	14+ (Phase 1–3 pages)
Commercial quote-form submissions	Not tracked (no dedicated path today)	Tracked from launch; growth trend established
Organic rankings, city + "pressure washing" terms	Not ranking	Page-one presence for San Jose & Santa Clara
Residential Jobber bookings	Current baseline	Maintained or improved
Core Web Vitals (mobile)	Unverified	Passing thresholds sitewide

Assumptions & dependencies

- ✓ Hygeia provides the content/asset dependencies listed in Section 09 before Phase 2 content population begins
- ✓ Certification scope for DVBE/DGS/DIR on the pressure-washing service line is confirmed with the certifying agency before the commercial page's certification module goes live
- ✓ Jobber account and API/embed access remain available for the booking integration
- ✓ Domain, hosting, and DNS access are available for the CMS setup in Phase 1

This PRD and Scope of Work is a companion document to the September 2026 Hygeia Power Wash Solutions Digital Growth Audit and the accompanying high-fidelity design mockups. Timeline is expressed in relative weeks from kickoff; align to a firm start date when a build partner is engaged.
